

## **Necessary Security**

When It's Necessary!

### **Necessary Security LLC. Threat Modeling Maturity Assessment (TMMA)**

At Necessary Security LLC., we recognize the critical importance of proactive cybersecurity measures in safeguarding your organization against evolving threats. Our Threat Modeling Maturity Assessment is a structured, comprehensive evaluation tailored to your specific needs, designed to provide actionable insights and strategic guidance to enhance your cybersecurity posture.

#### **Overview:**

The TMMA is not just a snapshot of your current state; it's a roadmap to your desired future state. Our seasoned consultants, boasting over 25 years of industry experience,

collaborate closely with your team to perform a thorough assessment, covering key areas including current state analysis, requirements gathering, goal definition, timeline estimation, budgetary considerations, and staffing recommendations. These are all measured against six dimensions including Maturity, Capability, Coverage, Automation, Metrics, and Integration.

## Key Offerings:

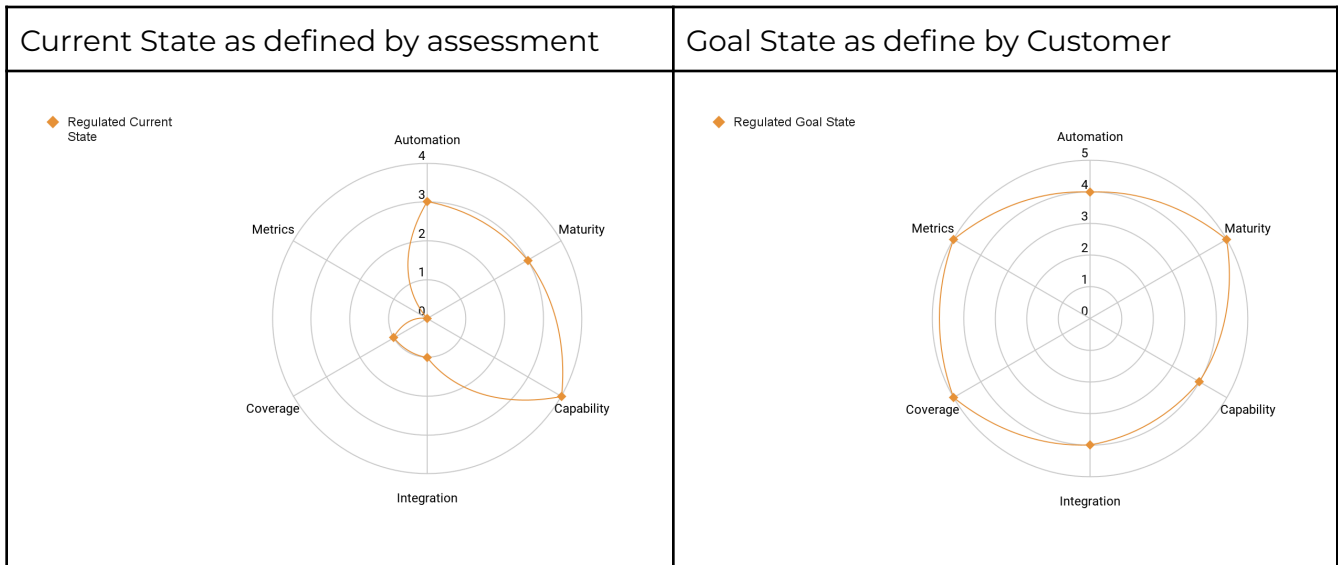

1. **Structured Assessment Approach:** Our consultants conduct a structured assessment to understand your organization's current threat modeling practices, identify gaps, and define strategic objectives aligned with your business goals.
2. **Customer Profile Mapping:** Leveraging our deep industry expertise, we provide a tailored profile score for current and future state. Our methodology uses the profile scores to recommend products and services that deliver the customer on their path from current state to future state..
3. **Data-Driven Insights:** Our data gathering methodology incorporates customer and industry data to inform product feature prioritization, ensuring that customers are directed towards areas with the highest impact on your organization's security posture.
4. **Program Planning Support:** Our Threat Modeling Maturity Assessment offers invaluable support in program planning, equipping your organization with actionable recommendations to strengthen your cybersecurity resilience.
5. **Progression Tracking and Next Steps:** We provide a method to track your organization's progression in threat modeling maturity, coupled with clear next steps for ongoing sales and investment strategies to continuously enhance your cybersecurity defenses.

## What the Threat Modeling Maturity Assessment is Not:

- **Delivery of Services and Artifacts:** While we provide strategic guidance and recommendations, the Threat Modeling Maturity Assessment does not encompass the actual delivery of services or artifacts.
- **Project Management Function:** Our focus is on providing strategic insights and recommendations; project management functions are not included in this offering.
- **Advisory Service:** While our assessment includes advisory elements, it goes beyond traditional advisory services to offer actionable insights tailored to your organization's specific needs.

## Example Content:

This radar diagram is representative of a visual aide to represent the profile of a customer in the current state and goal state.

The artifact produced as part of the TMMA will have a summary of the work performed, who participated in the effort, details of how scores were rated, and prescriptive path on how Necessary Security LLC., services can bring the customer from current state to goal state. This artifact is the planning document to enable executives to forecast for budget, resources, and have a firm representation of options available to them for their Threat Modeling program.

### Conclusion:

Our Threat Modeling Maturity Assessment empowers your organization with the insights and strategic guidance needed to provide structure and business aligned purpose, strengthen your cybersecurity defenses, mitigate risks, and achieve your long-term security objectives. Partner with Necessary Security LLC., to elevate your cybersecurity posture and stay ahead of emerging threats.
